

# Fixed photovoltaic bracket block

## Overview

---

The fixed bracket is the most basic form of photovoltaic module bracket. It is suitable for ground solar power stations and rooftop installation, and can be adjusted according to different angle requirements. By using Shielden's high-performance photovoltaic mounts, you can ensure that your solar power system is always running at its best, bringing you sustainable green energy and significant economic benefits. A PV bracket is a support structure that arranges and fixes the spacing of PV modules in a certain orientation and angle according to the specific geographic location, climate, and solar resource conditions of the PV. Photovoltaic brackets are key components of solar power generation systems and play a role in supporting and fixing photovoltaic power generation systems. Designed for durability and precision, our brackets ensure stability and efficiency in residential, commercial, and industrial applications. These brackets are typically made from high - quality materials such as aluminum or zinc alloy, which. The Ground-Mounted Fixed Bracket system represents an optimized structural solution for photovoltaic array installation, employing stationary tilt-angle support structures fabricated from hot-dip galvanized steel or anodized aluminum alloy.

114KWh ESS

### Ground Solar Bracket Solutions

The ground solar bracket installation system is designed to be suitable for solar farms with cement pier bases and ground screw pile bases. Galvanized material photovoltaic bracket material has excellent ...

### Performance and Features of Fixed Photovoltaic Brackets

Fixed photovoltaic brackets do not rotate with the changing angle of solar incidence but receive solar radiation in a fixed manner. They are categorized based on the set tilt angle into: ...

## When should I choose a fixed photovoltaic bracket?

Fixed photovoltaic brackets are a popular choice in the solar energy market. They are designed to hold solar panels in a stationary position, providing a stable and reliable support structure.
