

# Fixed photovoltaic bracket on concrete roof

## Overview

---

Use concrete with a strength grade of C20 or higher. Position panels according to design. Flat concrete roofs are ideal for solar panel installations due to their stability and the freedom to optimize panel orientation and tilt. There are two common methods for installing solar panels on concrete tile roofs. Designed by installers, for installers, these complete solar racking. Installation Method Selection is Critical: The three primary installation methods (tile hooks, comp-out, and tile replacement mounts) each serve different scenarios.
