

# Four lights on the photovoltaic inverter are on

## Overview

---

Solid: Powered by the grid (ideal for nighttime). Flashing: Running on battery/solar (check battery if flashing persists >24 hours). Your inverter has a switch and three colored LEDs that indicate system information, such as errors or performance. The following tables detail the possible LED and switch combinations, and what they mean. Any combination of LEDs on. What is the model name next to the green dot?

I would, if you can, connect a CAT-6 Ethernet cable to the RJ-45 Ethernet port on your Gateway (Envoy) and then the other end to an Ethernet port on your router, then power the Gateway or Combiner box up. Being able to read and understand your solar inverter display is crucial for monitoring system performance, identifying potential issues, and. SMA Inverter Lights - What do they mean?

Indicator: Solid Blue = Internet co will also show a fault code on the screen  
You can look up this code/message online. Access Main Menu Press the MENU button to get to the main menu options. Check Total Energy Generated.
