

# Galvanized briquettes for photovoltaic panels

## Overview

---

Made of low carbon steel and then hot-dip galvanized, it offers excellent corrosion resistance and a sturdy structure, providing a reliable pathway for solar panels. It is suitable for solar brackets and accessories, as well as a key component of rooftop solar installation. At Parco Engineers, we specialize in high-quality, hot dip galvanized (HDG) solar structures designed for durability and performance. Galvanized steel is steel coated with a zinc layer through a hot-dip process. Hot-dip galvanizing (HDG) provides corrosion protection that will not only recoup initial costs over the lifetime of the project with. HDG Grating Walkway is an ideal solution for solar photovoltaic power projects. Constructed from high-quality C-steel, these brackets provide robust support for various solar applications. Our products comply with international standards such as ISO 1461 and ASTM A123, ensuring excellent corrosion.
