

# General solar panel lifespan

## Overview

---

The average lifespan of a solar panel is 25 to 30 years, with many systems continuing to generate electricity well beyond this range. High-quality panels from reputable manufacturers often come with warranties guaranteeing at least 80% of their rated power output for 25 years or more. Solar panels don't suddenly shut down. That's the real story behind solar panel lifespan. Not just how long they last, but how well they perform along the way. 5% more electricity over 25 years compared to standard panels, often justifying the higher initial investment through extended productive life and better. These impressive numbers show why solar panel lifespan is a vital factor for renewable energy investments.
