Fracture Analysis of Generator Fan Blades

Visual inspections were taken on the generator parts especially on the fan blades and the effect of accident on them was studied. Three kinds of blades were found in the turbine casing after the ...

Rotor Windings and Related Components in Generators

Fan blades in hydro units assist in cooling the rotor and maintaining optimal operating temperatures, which is key to generator performance and extending component life.

Turbine - Generator Fan Failures

Generator rotor fans/blowers are subject to both high steady and fatigue stresses during operation. The fan/blower blade itself is highly stressed. The highest stresses in an axial blower are developed in the ...

Failure analysis of generator rotor fan blades

The failure analysis of a generator rotor fan blade was investigated by mechanical analysis and metallurgical examination of fracture surface. Fracture took place at the airfoil root, surface ...

Fracture Analysis of Generator Fan Blades

The failed fan consisting of 11 blades was mounted on the generator-rotor at the turbine end, and had a total service life of about 41000 hours prior to the

failure. The fan rotational speed ...
