

# Georgia Communications solar Base Station Battery

## Overview

---

This strategic site is co-located with the existing solar facility adjacent to the Robins Air Force Base and allows Georgia Power to leverage existing infrastructure, thereby eliminating the need to construct new transmission generator step-up (GSU) project-level substations and. This strategic site is co-located with the existing solar facility adjacent to the Robins Air Force Base and allows Georgia Power to leverage existing infrastructure, thereby eliminating the need to construct new transmission generator step-up (GSU) project-level substations and. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through. In a continued effort to limit its use of fossil fuels to mitigate peaks, Georgia Power Company is adding a whole mess of new BESS. Designed for various industrial.
