

Georgia Solar Panel Greenhouse Processing

Overview

The 255,000-square-foot facility is designed to address the growing challenge of end-of-life solar panels. It is now processing thousands of panels each week, with plans to scale operations to handle approximately one million panels annually by the end of 2026. SOLARCYCLE has started recycling solar panels at a massive new facility in Cedartown, Georgia, signaling that solar recycling in the US is finally moving from pilot projects to industrial scale.
