

Germany stops installing photovoltaic panels

Overview

Germany's PV installations dropped sharply in March 2025, with new regulations like the Solarspitzenengesetz impacting rooftop solar growth. German solar panel demand has been hit by dampened consumer and investor sentiment, as the ongoing cost of living crisis and high interest rates have hampered installations. The latest data from Germany's Federal Network Agency. The German solar industry has issued a strong warning against proposed cuts to subsidies for new small rooftop photovoltaic (PV) systems, following remarks by Economy Minister Katherina Reiche, who suggested that such subsidies are no longer necessary due to the profitability of these systems. The. The home-fitted renewable-energy sources are inexpensive and easy to install, and reduce electricity costs. Here's what can be learned from their surging popularity in Germany.
