

Good PV panel prices in Canada

Overview

The average cost of a residential solar panel system in Canada is around \$2.50 per watt before incentives. This means that for a 10 kW system, homeowners can expect to pay between \$25,000 and \$35,000 before any rebates or tax credits. But how much do solar panels cost in Canada in 2025?

This guide breaks down the average cost of solar panels, installation prices by province, and available incentives to help you determine whether solar is a good investment for your home. The size of your house, like 2000 square feet, is a good starting point, but your utility. You might have heard about prices dropping – and they did, big time. That's massive! The main reason was a surge in manufacturing capacity, basically more panels being made than were. BC offers up to \$10,000, Nova Scotia \$3,000, PEI up to \$10,000. Qualified installers like Firefly Solar offer interest-free financing options. Company stability matters most. Your 25-year warranty is only as good as the company behind it.

Good PV panel prices in Canada
