

Has the photovoltaic panel fallen into place

Overview

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. US residential solar is on a downturn and it may soon get worse. In a shock for the industry, the latest draft of the One Big Beautiful Bill Act excludes residential solar lease providers from the Investment Tax Credit. For all the good news -- big federal incentives and ever-increasing interest in renewable energy -- there's also been some not-so-great news, with some solar installers slashing jobs or closing. A decade ago, someone knocking on your door to sell you solar panels would have been selling you solar panels. Now, they are probably selling you a financial product—likely a lease or a loan. Mary Ann Jones, 83, didn't realize this had happened to her until she received a call last year from. A massive solar farm of two million panels in the Mojave Desert is heading for dormancy just 11 years after going into operation. Seeking to reduce energy costs and enhance sustainability, homeowners are now grappling with incomplete projects and unanswered.
