

# Have the photovoltaic panels been fixed

## Overview

---

Connect with a local solar provider for maintenance and repairs. While solar panels themselves are remarkably durable, your solar inverters are more likely to require repairs or replacements. If you notice a sudden dip in production, it's often due to an inverter issue likely caused by overheating. Solar panels have become a widely adopted and eco-friendly energy solution. However, like any technology, they are susceptible to issues affecting performance.
