

# Heterogeneous solar cell modules

## Overview

---

Heterojunction solar cells (HJT), variously known as Silicon heterojunctions (SHJ) or Heterojunction with Intrinsic Thin Layer (HIT), are a family of technologies based on a formed between semiconductors with dissimilar . They are a hybrid technology, combining aspects of conventional crystalline solar cells with .

### Heterojunction solar cell

OverviewHistoryAdvantagesDisadvantagesStructureLoss mechanismsGlossary

Heterojunction solar cells (HJT), variously known as Silicon heterojunctions (SHJ) or Heterojunction with Intrinsic Thin Layer (HIT), are a family of photovoltaic cell technologies based on a heterojunction formed between semiconductors with dissimilar band gaps. They are a hybrid

technology, combining aspects of conventional crystalline solar cells with thin-film solar cells.
