

Household solar power generation components supply

Overview

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment—at a minimum. Depending on where you live, you may also consider a solar battery. But different product options and brands can. By the end of this article, you'll know what each solar component does—from panels and inverters to batteries, controllers, wiring, and mounting systems—and why it matters for your setup. Having solar panels makes smart financial sense as power gets more costly. Your solar energy installer and local utility company can provide more information on the.
