

How are the photovoltaic panels this year

Overview

Following a low second quarter, the industry is ramping up as the end of year approaches. Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. The US solar industry installed 11. High interest rates and economic uncertainty continued to suppress demand. However, there were no additions of upstream manufacturing capacity (polysilicon, wafer, or cell).

How are the photovoltaic panels this year

Spring 2025 Solar Industry Update

o In 2024, between 554 GW. dc. and 602 GW. dc. of PV were added globally, bringing the cumulative installed capacity to 2.2 TW. dc. o China continued to dominate the global market, ...
