

How does Zhongnan Yingli photovoltaic panels generate electricity

Overview

They use this sunlight to create direct current (DC) electricity through a process called "the photovoltaic effect. It has grown rapidly over the years and has shipped more than 24 GW of panels to over 100 countries. A publicly-traded company (NYSE:YGE), Yingli is one of the world's largest solar panel manufacturers, and at. Yingli does not offer many options, with only two mono PV modules to choose from, the YLM 120 half-cut cell all-black panel and the YLM 144 half-cut cell monofacial panel. A solar panel's power rating refers to its wattage. Their value proposition focused on delivering reliable, high-performance Yingli panels at competitive prices. This approach. As of September 2008, Yingli is one of the largest manufacturers of PV products in China with an annual production capacity of 400 megawatts for polysilicon ingots and wafers, 400 megawatts for PV cells, and 400 megawatts for PV modules.
