

# How long is the longest solar panel

## Overview

---

Most solar panels manufactured as of publishing last about 25 to 30 years. Time, extreme sunlight and voltage leaks increase solar panel degradation. They lose power gradually, year after year, until they're no longer pulling their weight. Not just how long they last, but how well they perform along the way. If you're counting on solar to deliver long-term. What Else Affects How Long Your Solar Panels' Lifespan Is?

When picking the right solar panels for your EcoFlow setup, you need to think about efficiency, cost, and how long they will last. New systems in 2026 are more robust than those in previous years. Its performance naturally declines over time, eventually rendering its "useful life" complete.
