

# How many batteries are in an energy storage container

## Overview

---

Maximum batteries per container are designed to include 21 strings, with 12 battery modules, for a total of 252 modules. A BESS container's capacity typically ranges from 250 kWh to over 3. How to calculate BESS capacity?

BESS capacity is calculated based on battery rack energy (kWh per rack) ×. Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. This setup offers a modular and scalable solution to energy storage.

### What is an Energy Storage Container?

Most energy storage containers currently employ lithium-ion battery technology. Common chemistries include lithium-iron-phosphate and nickel-manganese-cobalt types.
