

# How many inverters are there for the Nairobi solar container communication station

## Overview

---

How many solar inverters can be connected to ESS?

The grid-tied and off-grid ESS supports a maximum of three SUN2000-(2KTL-6KTL)-L1 inverters (with batteries) cascaded. as an option and can control the output of the inverters. This means that PV systems can be designed with several MV stations,whereby not phasis on maximizing power extraction from the PV modules. While maximizing power transfer remains. The inverter station houses all equipment that is needed to rapidly connect ABB central in R INVERTERS—ABB inverter stationSolar invertersABB's PVS800 central inverters are the result of decades of industry experience.
