

# How many kw can the battery cabinet carry

Solar

## Overview

---

The first generation PWRcell Battery Cabinet is an outdoor-rated battery enclosure with a battery management unit (BMU). One battery cabinet can provide up to 18 kWh of useable energy. Usable Battery Energy, battery temperature, cabinet temperatures above 104 °F (40 °C) and below 32 °F (0 °C). Your primary use case should drive capacity decisions, not maximum theoretical needs. Factor in 10-15% efficiency losses and plan for 20% capacity degradation over 10 years. • xStorage BESS holds 250 to 1000 kWh of usable stored energy (279 to 1117 kWh of installed energy). It is designed for rapid deployment, standardized installation, and reliable long-term operation.

## How is the capacity of the energy storage cabinet expressed?

The power rating, typically measured in kilowatts (kW), denotes the maximum amount of power that can be harnessed or delivered by the energy storage cabinet at a given moment.
