

How many watts does an IP67 waterproof solar light have

Overview

Designed for industrial and urban applications, its IP67-sealed housing and 30AH LiFePO4 battery deliver 36-48hr runtime and uncompromising durability. 400W Raw Power: 341 industrial-grade 5730 chips for unmatched brightness. IP67 Extreme Protection: Fully sealed against submersion. The wattage of a solar floodlight, specifically the IP67 model, can vary significantly depending on several factors, including the manufacturer, design, and intended application. Energy saving and environmental protection. IP67 waterproof rated for trouble free outdoor installation in all weather. IP67: An IP67-rated light is "dust tight" and water-submersible for up to 30 minutes, with a maximum depth of one metre. This indicates that it is impervious to water damage altogether, resilient enough to survive prolonged downpours and even submersion in a pond or pool. Built-in high-brightness LED light chips, low power consumption.
