

# How much does a solar inverter module cost

## Overview

---

A solar inverter costs \$2,000 on average, with prices often ranging from \$1,000 to \$3,000. That said, some homeowners spend as little as \$800 or as much as \$5,000. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter makes up about 10% of the total cost of your solar energy system. 24 per watt on a solar inverter, not including labor costs. Most solar panel contractors. Typical price ranges for different inverter types. We offer a wide selection from top manufacturers, so you can be sure you're getting. However, you can also get an inverter prepackaged together with a charge controller, battery and other components by buying a solar generator.
