

How much does a solar panel cost in Southeast Asia

Overview

On average, homeowners can expect to pay approximately S\$1,500 to S\$2,000 per kWp for a residential rooftop solar system. Therefore, a 10 kWp system, suitable for many landed properties, may cost between S\$15,000 and S\$20,000. This article analyzes photovoltaic panel price trends in the region while exploring key factors shaping market dynamics – perfect for solar project developers, energy consultants, and procurement managers seeking data-driven decisions. Photovoltaic panel prices in Southeast Asia have shown a 12% decline. The U.S. A group of American solar manufacturers, including First Solar and Hanwha Qcells, filed a complaint. The first 2025 edition of the Southeast Asia Solar Supply Chain Map includes significant revisions and additions, driven by valuable market feedback and the region's evolving geopolitical and industrial dynamics. Thanks to new data, this edition includes entries such as ICA Solar and United. The Southeast Asia Solar Energy Market Report is Segmented by Technology (Solar Photovoltaic and Concentrated Solar Power), Grid Type (On-Grid and Off-Grid), End-User (Utility-Scale, Commercial and Industrial, and Residential), and Geography (Vietnam, Indonesia, Philippines, Thailand, Malaysia). Southeast Asia's Solar Energy Market is witnessing significant growth as the region embraces renewable energy solutions to meet its rising power demands sustainably. Break-even point: Most homeowners recover their investment in 5 to 7 years through electricity savings.
