

# How much is a watt of Longi s photovoltaic panels

## Overview

---

A rough estimate for a typical LONGi solar panel (assuming a medium-to-high efficiency rating and standard wattage) can range from USD 0.40 per watt, depending on market conditions and the specific model. LONGi solar panels cost about \$3. These panels exhibit a lower-than-average annual degradation rate of approximately 0.5%. LONGi supplies its reliable, high-performance solar modules to 6 continents and 85 countries and regions to power the world toward a low carbon future. HIBC (Hybrid Interdigitated Back-Contact) refers to a high-low temperature composite passivated back contact technology. Additionally, government incentives, such as tax credits, can significantly reduce the cost of solar panels. When it comes to power output, LONGi Solar panels have proven to be a reliable choice for many solar energy enthusiasts. You'll likely pay a higher upfront price for the.
