

How to deal with unusable photovoltaic panels

Overview

If you're replacing a home solar energy system, follow these steps to dispose of panels safely: Never attempt to uninstall panels yourself. Solar panels are heavy, electrically sensitive, and often located on rooftops. Find information here about different types of solar panels and how they are regulated at end of life. Most homeowners save around \$60,000 over 25 years. Depending on their condition, solar panels can be reused, recycled, or disposed of in landfills at the end. As solar installations expand globally, we face a new, important challenge: managing photovoltaic (PV) modules at the end of their operational life. Just because a solar panel is out of warranty after 20 or 25 years doesn't mean it stops working. In fact, many panels still generate 70-80% of their. Proper waste management and recycling are crucial to ensuring that solar energy remains a sustainable option.
