Overview

To activate the backup energy storage cabinet during a power outage, follow these steps: 1. Ensure the cabinet is charged, 3. Power down non-essential devices, 4. Today, we have more options than ever with solar power and battery storage. Portable generators are affordable, but not automatic. Standby Generators manage power and keep the. During a blackout, the system automatically switches on and powers essential devices, so you can keep the lights on, the fridge running, and your Wi-Fi connected. The battery charges either from your solar panels or the grid, then holds that energy until you decide to use it.
