

How to use the drill bit for opening holes in photovoltaic panels

Overview

A diamond-coated or carbide-tipped drill bit is generally recommended for drilling through the tempered glass surface of solar panels. Here are some steps and precautions to follow when drilling holes into solar panels: Choose the right drilling tools: Use a high-quality drill with a variable speed control feature. Using excessive pressure: The photovoltaic effect is a process that generates voltage or electric current in a photovoltaic cell when it is.
