

How to use wind power cable wind rope

Overview

Sam Purcell gives you a quick rundown on winding your winch rope or cable onto your 4X4 winch, ensuring it's ready for action. The first layer (wrap) around the winch drum should be put on closely and tightly. Winding Rope on a Winch is the first in a series of short technical videos designed to help you get the most from your high-performance ropes. Download the complete Technical. Using a winch right means knowing how to properly wind a new cable. This guide, based on advice from Warn Industries, offers key safety tips and steps for installing your winch cable right. Before beginning, make sure to check your winch cable to avoid dangers like tangling, crushing, or getting. But I use it, or at least the underlying principle, to winding just about everything: ropes, wires, power cords, garden hoses, etc. And it isn't that different from how folks often wind up ropes, but there is a small change that makes a big difference. It makes quick antenna setup and take-down. In order to minimize that risk, it is important that you read this Basic Guide carefully, familiarize yourself with the operation of your winch before having to use it, and be constantly safety oriented.
