

# Huawei Senegal Wind Solar and Energy Storage

## Overview

---

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid. HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It builds a product ecosystem centered on solar inverters, charge controllers, and energy. Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development. Axian Energy, Voltalia, and Entech have announced the signing of an EPC (Engineering, Procurement, and Construction) contract for Senegal's NEA Kolda project, It is the largest photovoltaic power plant with battery energy storage systems (BESS) in West Africa. The signing of the contract between. Senegal has reached an 84% electrification rate, with 294 MW of residential PV installed, while several large-scale solar-plus-storage projects are under development, despite the start of production at the Sangomar gas field.
