

Inner Mongolia photovoltaic power generation bracket installation

Overview

The project has also innovated with “integrated bracket + module installation” technology, the first of its kind internationally. This significantly reduces manual labor and improves installation efficiency by 25 percent. So far, more than 90 percent of the modules have been installed. Inner Mongolia photovoltaic bracket and accessories resources, which are utilized in the production of solar panels. Baotou City, also referred to as the “Green Silicon City” in China, stands out as. The 3-million-kilowatt photovoltaic power station project in the Ordos coal mining subsidence area of Inner Mongolia, constructed by the CHN Energy Investment Group's Inner Mongolia Company, is part of China's second batch of large-scale wind power and photovoltaic bases. After the project is completed, the sales revenue will be 2 billion yuan, the annual profit and tax will be more than 50 million yuan, and the local employment will be more than 500 people.

Inner Mongolia photovoltaic power generation bracket installation

INNER MONGOLIA SOLAR PHOTOVOLTAIC BRACKET

The top three largest provinces refer to Xinjiang, Inner Mongolia and Qinghai, whose PV area ratio are 14.92%, 12.49% and 11.26%, respectively, with a total of nearly 40% of all the PV power
