

# Install solar power generation on the roof of the cargo box

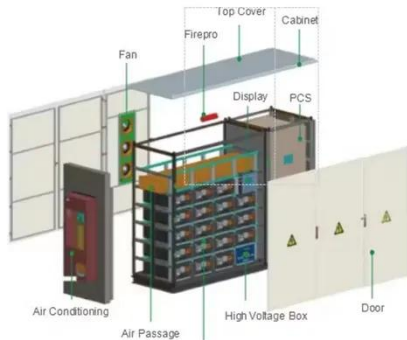

## Overview

---

In today's video, I'm installing 800 watts of Renogy solar panels on the roof of my box van! I'll show you the full mounting and wiring process step-by-step. We'll cover everything from layout and brackets to MC4 connections, cable routing, and sealing the roof. If you're planning a DIY solar. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I have a 16' cargo trailer to mount these panels to. I have 4 of the roof racks in the photo. I am wondering the most sturdy/safe way to mount these to the. Looking everywhere online, I couldn't find many examples of people mounting a solar panel to a roof box. I didn't know if this would work, and some of the viewers on the YouTube channel also shared their doubts and skepticism with me, but I'm happy to report that it works. Installing solar panels on your van or RV might seem like a daunting task, but with the right knowledge and preparation, it's a project that many DIY enthusiasts can tackle. This comprehensive guide will walk you through the entire process, from planning your solar system to maintaining it for.
