

Iranian solar power generation for home use

Overview

The government recently announced plans to partner with private investors to develop solar power plants, marking a pivotal shift towards renewable energy. SATBA chief Mohsen Tarzatab, who also serves as Deputy Energy Minister, announced that 150. Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has issued construction permits for nearly 100 GW of solar power projects. (Photo by Morteza Nikoubazl/NurPhoto via AP) Iran has realized the value of its vast renewable energy potential—but serious international and. In addition, Iran's power facilities are seriously aging, and the power loss is large, the domestic power generation capacity is 92,000 megawatts, but the operational capacity of the national grid is only about 71,000 megawatts, which means that about 23% of the country's power generation capacity.
