

Is it cheap to use solar panels

Overview

Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. The quality of solar panels can significantly impact how efficiently your system operates, its lifespan, and the amount you save over time. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our. Converting your home to renewable energy by installing a rooftop solar panel array is a major financial commitment for most homeowners. Anything you can do to lower the cost goes a long way to making it easier to take the leap and start paying your utility company less money each month. Your actual cost depends on your.
