

Is it feasible to use photovoltaic panels as roofs

Overview

Yes, you can use solar panels as a roof. Options for a more classic design and a more modern look are plentiful. However, the precise construction will vary depending on the product you select. With solar panels becoming more affordable every year, installing solar panels as a roof is now equally as expensive or even less expensive than adding solar panels to a regular. Using solar panels as a roof blends energy generation with protective roofing, offering aesthetic and functional benefits compared to traditional rooftop systems. This article explains product types, cost and lifespan comparisons, installation considerations, building code and warranty. Solar power has continued to grow in popularity and drop in cost, meaning many of us are weighing up the pros and cons of installing photovoltaic (PV) panels on our roofs. By embedding solar technology into shingles or tiles, BIPV eliminates many drawbacks of traditional systems.

Is it feasible to use photovoltaic panels as roofs

What is the best roof for solar panels?

Curious about the best solar panel roofing? We've got you covered. Read on to learn more about solar panel roofing options and how to choose.
