

Is it good to install solar panels on the roof of a split-level building

Nominal Capacity

280Ah

Nominal Energy

50kW/100kWh

IP Grade

IP54

Overview

For some, the answer is a resounding yes because it means utility cost savings, increased home value, and potentially even tax breaks and incentives. For others, it might take a little longer to mull it over. Luckily, that's what we're here to help with in this guide. Installing solar panels on rooftops offers many advantages. In this case, if solar panels produce excess electricity, it feeds back to the grid, earning credits through net metering. However, the initial costs and practical concerns merit consideration. Whether your home has asphalt shingles, tile, wood, or metal roofing, solar is a smart and sustainable home upgrade. **What Types of Roofs Can Solar Panels be Installed On?**

Short answer: most of them!. Factors like your home's location, roof space, and budget can significantly impact whether solar panels are a practical choice for you.
