

# Is solar power generation available in rural areas now

## Overview

---

With ample land, strong solar potential, and new federal funding streams, rural solar development is on the rise. Community solar power has many benefits and it provides a flexible option for some people in the event homeowners can't afford their own solar power systems or utilities are not going to develop their own solar power systems. (About. Department of Energy research projects solar energy to rise from 4% of our nation's total energy production to 45% by 2050, potentially requiring nearly 10. DOE expects 90% of projected solar. Leveraging local strengths such as open land, agricultural innovation, and community-driven initiatives, these regions are embracing solar power, energy storage, and sustainable lithium extraction. From Thompson's solar farms and dairy digesters to Moloka'i's microgrids and Imperial Valley's. Across the country, solar farms have experienced rapid growth, supported by advancements in technology, cost reductions, and policy initiatives such as state-level renewable portfolio standards and tax credits. As shown in Map 1, roughly 18% of ground-mounted PV facilities in the U. are stepping into the spotlight in 2025. Department of Agriculture (USDA) and U.
