Battery Cabinet

## Overview

---

A solar wall light is an outdoor light powered by solar energy. When the sun sets, the stored energy powers LED lights, automatically lighting the area. Not only do they not require electricity, but they are powered only by sunshine, unlike traditional lights. This means no complex setup, no ongoing costs, and no wiring. Solar wall lights are now more adaptable than ever because of features like motion detectors, changeable brightness settings, and. These lights harness the power of the sun, providing illumination without the need for traditional electricity.
