

Is the price of solar modules the price of solar panels

Overview

Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components. Prices are compiled from three sources: Nemet (2009) for 1975-2003, Farmer & Lafond (2016) for 2004-2009, and IRENA for 2010 onward. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). 28/W, ending years of dramatic fluctuations as supply-demand dynamics rebalance and weak suppliers exit the market.
