

Is there any subsidy for solar power generation in the Netherlands

Overview

There is no longer a national purchase subsidy, but some municipalities still offer local subsidies or sustainability loans with low interest rates. At SunCharged, we closely monitor all subsidy opportunities and inform you about schemes in your municipality. Is there a subsidy for solar panels in the Netherlands?

Since 2023, the 0% VAT rate applies to both the panels and the installation, which provides a direct saving of 21%. Do you have a system that makes electricity from. Adding to these pressures, recent analysis by energy experts Eelco Rondhuis (PowerField) and Sjak Lomme (Energeia) reveals that the country's subsidy system contains a fundamental calculation flaw that systematically undercompensates asset owners. You can also reduce your costs for electricity and hot water significantly. This includes heat pumps, biomass boilers, and solar panels, of course. The Dutch government extended the Investment Subsidy for.
