

Kenya solar Energy Storage System Project

Overview

Kenya Electricity Generating Company (KenGen) is powering forward with its green energy ambitions, officially launching the prequalification process for a 42.5 MWac solar PV plant and a 3 MW / 4.5 MWh battery energy storage system (BESS) at its iconic Seven Forks hydro. Kenya currently has approximately 210 MW of grid-connected solar, accounting for 6.5 per cent of installed electricity capacity. More than 100,000 customers are connected through solar mini-grids, and over two million solar home systems are sold annually, positioning Kenya as one of Africa's most. NAIROBI, Kenya, Feb 3 - Kenya has renewed its call for faster deployment of solar energy and battery storage as Intersolar Africa 2026 officially opened at the Sarit Expo Centre in Nairobi, bringing together policymakers, investors and clean energy players from across Africa and beyond.
