

# Large-capacity solar energy storage cabinet for hospitals

## Overview

---

These systems are designed to store surplus energy generated by solar panels during the day for use when sunlight is unavailable, such as at night or during cloudy periods. This maximizes self-consumption of your solar energy, reducing reliance on the grid and lowering. With large roof spaces, hospitals, clinics and health centres have a fantastic opportunity to benefit from renewable energy, especially from solar panels and battery storage systems. Bronglais General Hospital in Aberystwyth is already seeing significant benefits from the installation of its solar. Energy storage for healthcare use can present an innovative solution to provide critical backup power for healthcare facilities and homes. The new microgrid system at the Kaiser Permanente Ontario Medical Center in Southern California adds 2 MW of on-site solar generation and 9 MWh of non-lithium battery.

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW/115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

### Solar Panels and Battery Storage for Hospitals

The hospital has installed a solar PV system combined with battery storage, resulting in a significant reduction in energy costs and carbon emissions. The system has provided the hospital ...
