

Latest news on Cuban energy storage battery companies

Overview

On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges. These Battery Energy Storage Systems (BESS), also referred to as "concentrator units," are being placed at Cueto 220, Bayamo. Cuba installs batteries in substations to improve the use of solar energy and address the energy crisis. Despite these advancements, power outages persist due to the lack of capacity in the electrical system. This effort, which involves establishing approximately fifty photovoltaic parks across the nation, aims to address Cuba's persistent energy. Summary: Santiago de Cuba is emerging as a hub for innovative battery energy storage projects designed to stabilize regional grids and integrate renewable energy. "We're basically throwing away.
