

Latest news on Hail Photovoltaic Panels

Overview

A new insurance industry report has revealed that hail damage accounts for more than half of all weather-related claims for solar photovoltaic projects in the United States and Canada. AXIS Capital Holdings Limited released the findings Wednesday, after analysing five years of hail damage claims. Solar testing organizations are getting more serious about testing solar panels' resilience against hail damage. VDE Americas and RETC, part of the VDE Group, today introduce the hail resiliency curve (HRC) test that simulates real-world hailstorm conditions where solar panels may face numerous. Hail damage has become a real headache for project developers in the United States, where growing deployment has increased exposure to weather-related risk. Alex Roedel and Jyoti Jain, Nexttracker The global climate crisis is reshaping the way we think about energy resilience.
