

Latest on Southern Europe s battery energy storage solutions

Overview

1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. Residential installations declined by 6%. That's where energy storage solutions, such as batteries, have a vital role to play. Technological developments and market uptake have already had a positive impact on the storage sector: the costs of battery storage are down by 93% since 2010, according to the International Renewable Energy Agency. The EU installed a record-breaking 27. Explore 2025 BESS projects across Europe. AI-generated illustration by Battery Technology. 1 GWh of battery storage in 2025—up 45% year-on-year—with utility-scale deployments (15 GWh) surpassing residential (9. Europe's ability to translate lessons from the United States – in policy clarity, contracting, and hybridisation – will define how quickly the market.

Latest on Southern Europe s battery energy storage solutions

EU battery storage additions hit 27.1 GWh in 2025, Germany leads

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...
