

Latest updates on new policies for installing photovoltaic panels

Overview

September 2025 brings major US solar policy shifts, from ITC guidance and tariffs to state battles over net metering, storage, and permitting. From revised federal guidance on the Investment Tax Credit (ITC) to state battles over net metering and renewable standards, these updates will shape the trajectory of. As 2026 approaches, the landscape of federal incentives for solar energy is shifting dramatically. The 2022 Inflation Reduction Act (IRA) had promised generous, decade-long tax credits for clean energy (including a 30% credit for home solar installations). However, a mid-2025 budget law -. The bill cancelled residential solar tax credits at the end of 2025 and added new timelines and restrictions for tax credits under Sections 45Y and 48E. On July 4th, 2025, President Trump signed H. This month's "Solar Policy.
