

Latest wind power projects

Overview

As of February 2026, there are 787 planned wind projects in development in the US, according to Cleanview's project tracker. Their total planned capacity is 203,744 MW. Wind power has been the largest source of renewable energy in the U. since 2019, with more than 153 GW installed. Although the country's capacity more than doubled from 2014 to 2023, most of the wind energy produced is onshore, with the offshore wind farms slowly rising.
