

# Lifespan of iron phosphate energy storage battery pack

## Overview

---

Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries are celebrated for their exceptional longevity, safety, and durability. At EXP PRO, our exclusive use of LFP technology means you benefit from: Enhanced Safety: LFP batteries offer a stable chemistry. As of 2024, the specific energy of CATL 's LFP battery is claimed to be 205 watt-hours per kilogram (Wh/kg) on the cell level. [13] BYD 's LFP battery specific energy is 150 Wh/kg. Under typical operating conditions, these batteries can endure between 2,500 and 9,000 charge cycles, translating to a lifespan of approximately 7 to 15 years. These can be key in storing the electricity created by renewable options, such as solar panels or wind turbines.

Overview Uses Specifications Comparison with other battery types History See also

Enphase pioneered LFP along with SunFusion Energy Systems LiFePO4 Ultra-Safe ECHO 2.0 and Guardian E2.0 home or business energy storage batteries for reasons of cost and fire safety, although the market remains split among competing chemistries. Though lower energy density compared to other lithium chemistries adds mass and volume, both may be more tolerable in a static application. In 2021, there ...
