

# Liquid flow solar container battery reform

## Overview

---

Researchers in Australia have created a new kind of water-based “flow battery” that could transform how households store rooftop solar energy. Credit: Stock Monash scientists designed a fast, safe liquid battery for home solar. The system could outperform expensive lithium-ion options. Their next-generation “flow battery” opens the door to compact, high-performance battery systems for homes, and is expected to be. Flow batteries are emerging as a transformative technology for large-scale energy storage, offering scalability and long-duration storage to address the intermittency of renewable energy sources like solar and wind.

## Liquid flow solar container battery reform

---

### Revolution in your garage: new water-based battery could crush ...

A new water-based "liquid battery" could make home solar storage safer and cheaper than today's \$10,000 lithium-ion systems.
