

# Longi photovoltaic panel attenuation rate

## Overview

---

The above is the annual attenuation of solar panels, which will remain between 80% and 85% after 25 years. LONGi supplies its reliable, high-performance solar modules to 6 continents and 85 countries and regions to power the world toward a low carbon future. LONGi has laid out several.

**Bifacial Technology Advantage:** The LONGi 540W's bifacial design can increase energy yield by up to 30% compared to traditional monofacial panels, making it particularly valuable for ground-mount installations with reflective surfaces like white gravel or concrete.

**Superior Degradation Resistance:** These panels exhibit a lower-than-average annual degradation rate of approximately 0.35%, and their gallium-doped silicon cells minimize first-year power loss.

LONGi Solar was founded in 2000 and is headquartered in Xi'an, China.

Managing a balance between necessary outstanding characteristics.
