

Low-pressure photovoltaic folding container for data centers

Overview

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up.

Low-pressure photovoltaic folding container for data centers

Mobile solar container range

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.
